Title Statement

Title: Annual Survey of Jails: Jail-Level Data, 2009

Alternative Title: ASJ 2009

Identification No.: 29081

Responsibility Statement

Authoring Entity: United States Department of Justice. Bureau of Justice Statistics

Production Statement

Producer: Inter-university Consortium for Political and Social Research

Place of Production: Ann Arbor, MI: Inter-university Consortium for Political and Social Research

Funding Agency: United States Department of Justice. Bureau of Justice Statistics

Series Statement

Series Name: Annual Survey of Jails: Jail-Level Data Series

Series Information: The Annual Survey of Jails, formerly titled National Survey of Jails, is the only data collection effort that provides an annual source of data on local jails and jail inmates. The series was begun in 1982 by the Bureau of Justice Statistics with data collected by the Bureau of the Census. Local jails are locally-operated correctional facilities that confine persons before or after adjudication. Inmates sentenced to jails usually have a sentence of a year or less, but jails also incarcerate persons in a wide variety of other categories. Data on the size of the jail population and selected inmate characteristics are obtained every five to six years from the Census of Jails. In each of the years between the full censuses, a sample survey of jails is conducted to estimate baseline characteristics of the nation's jails and inmates housed in these jails. Data are supplied on admissions and releases, growth in the number of jail facilities, changes in their rated capacities and level of occupancy, growth in the population supervised in the community, changes in methods of community supervision, and crowding issues. The data are intended for a variety of users, including federal and state agencies, local officials in conjunction with jail administrators, researchers, planners, and the public.

Years Produced: Annually, except every 5th year when the National Jail Census is produced.

Abstract

The Annual Survey of Jails (ASJ) is the only data collection effort that provides an annual source of data on local jails and jail inmates. Data on the size of the jail population and selected inmate characteristics are obtained every five to six years from the Census of Jails. In each of the years between the full censuses, a sample survey of jails is conducted to estimate baseline characteristics of the Nation's jails and inmates housed in these jails. The 2009 Annual Survey of Jails is the 22nd such survey in a series begun in 1982.

The ASJ supplies data on characteristics of jails such as admissions and releases, growth in the number of jail facilities, changes in their rated capacities and level of occupancy, growth in the population supervised in the community, changes in methods of community supervision, and crowding issues. The ASJ also provides information on changes in the demographics of the jail population, supervision status of persons held, and a count of Non-U.S. Citizens in custody.

The data presented in this study were collected in the Annual Survey of Jails, 2009. These data are used to track growth in the number of jails and the capacities nationally, changes in the demographics of the jail population and supervision status of persons held, the prevalence of crowding issues, and a count of non-U.S. citizens within the jail population. The data are intended for a variety of users, including Federal and State agencies, local officials in conjunction with jail administrators, researchers, planners, and the public. The reference date for the survey is June 30, 2009.

Jails are locally-operated correctional facilities that confine persons before or after adjudication. Inmates sentenced to jails usually have a sentence of a year or less, but jails also incarcerate persons in a wide variety of other categories. Local jails:

- receive individuals pending arraignment and hold them awaiting trial, conviction, or sentencing,
- readmit probation, parole, and bail-bond violators and absconders,
- temporarily detain juveniles pending transfer to juvenile authorities,
- hold mentally ill persons pending their movement to appropriate health facilities,
- hold individuals for the military, for protective custody, for contempt, and for the courts as witnesses,
- release convicted inmates to the community upon completion of sentence,
- transfer inmates for Federal, State, or other authorities,
- house inmates for Federal, State, or other authorities because of crowding of their facilities,
- relinquish custody of temporary detainees to juvenile and medical authorities,

- Study 29081 -

- sometimes operate community-based programs as alternatives to incarceration,
- and hold inmates sentenced to short terms (generally less than one year).

Summary Data Description

Time Period:	July 1, 2008 - June, 30, 2009
Date(s) of Collection:	June, 2009 - December, 2009
Country:	United States
Geographic Coverage:	United States
Geographic Unit:	City and County
Unit of Analysis:	Jail facilities
Universe:	All sampled jail jurisdictions (i.e., counties, municipalities, boroughs, etc.) identified through from the 2005 Census of Jail Inmates.
Kind of Data:	Survey data

Notes

DEFINITION OF TERMS

The following are terms used in the codebook:

- Local jail: A confinement facility usually administered by a local law enforcement agency, intended for adults but sometimes also containing juveniles, that holds persons detained pending adjudication and/or persons committed after adjudication for sentences usually a year or less. Excluded from the survey are temporary holding or lockup facilities that are not part of a combined function of a jail jurisdiction, from which inmates are usually transferred within 72 hours and not held beyond arraignment.
- Jurisdiction: A county (parish in Louisiana), municipality, township, or regional authority that administers one or more local jails.
- Regional jail: A jail in which two or more jurisdictions have a formal agreement to operate the facility.
- Juvenile: A person subject to the exercise of juvenile court jurisdiction for the purposes of adjudication and treatment based on the age and offense limitations as defined by state law. For the purposes of this report, a person of juvenile age is considered a juvenile even though they may be tried as an adult in criminal court.
- Adult criminal offender: A person subject to the original jurisdiction of the criminal court rather than the juvenile court because at the time of the offense the person was above a statutory age limit.
- Average daily population: To calculate the average daily population respondents were instructed to add the number of persons for each day during the period July 1, 2008 to June 30, 2009, and to divide the result by 365.

Notes

JAIL IDENTIFICATION (JURDID) AND THE FEDERAL INFORMATION PROCESSING STANDARDS (FIPS CODE)

The first 9 digits of the jail identification code (JURDID) are the government identification codes that the U.S. Census Bureau uses to identify governments in the United States. The GID maintains the name and unique identification code for all local governments in the United States, based on the 2009 Census of Governments and is the Census Bureau's master list of all governments in the United States. The GID code identifies the location of governments, whether they are state, county, city, place, or municipality.

An alternative scheme for identifying places is the Federal Information Processing Standards (or FIPS) codes, which are a standardized set of codes issued by the National Institute of Standards and Technology to ensure uniform identification of geographic entities throughout all federal government agencies. The entities covered under the FIPS include states and equivalent entities, counties, named populated and related location entities (such as places and county subdivisions) as well as American Indian and Alaska Native areas. More information about FIPS codes as well as the identifications of areas under FIPS can be found at <http://www.census.gov/geo/www/fips/fips.html>.

The GID code is not equivalent to the FIPS codes. The Census Bureau provides a crosswalk between the GID codes and FIPS codes through its integrated directory, which can be found at http://harvester.census.gov/gid/gid_07/options.html.

Methodology and Processing

Data Collection Methodology

Time Method: Cross-section

Data Collector: United States Department of Commerce. Bureau of the Census

Sampling Procedure: Based on information from the 2005 Census of Jail Inmates, a sample of jail jurisdictions was selected for the 2009 survey. The sample included all public and private jails in 874 selected jail jurisdictions (in which there were a total of 934 reporting units). Sampling Procedure: The universe included all jail jurisdictions (i.e., counties, municipalities, boroughs, etc.) identified through the 2005 Census of Jail Inmates.

The 2005 Average Daily Population (ADP) was used to stratify the sample, with allocation to the strata based on the 2005 one-day count, 1999 one-day count, and the 1999 ADP. Other 2005 variables were also considered in the final allocation: confined adult males, confined adult females, confined Whites, confined Blacks, confined Hispanics, confined males, confined females, and confined adults. Large Jails and regional jails were in the sample with certainty.

In drawing the sample, jail jurisdictions were first stratified into two groups: single-jurisdiction jails and regional jails. The entire population of regional jails was included in the survey. Other jail jurisdictions included with certainty (268) were those that (1) held at least one juvenile

- Study 29081 -

inmate at the time of the 2005 Census of Jail Inmates and that had an average daily population of 500 or more inmates during the 12 months ending June 30, 2005, or (2) held only adults and the average daily inmate population was 750 or more. The remaining jurisdictions were then further stratified into two groups: jurisdictions with jails authorized to hold juveniles and jurisdictions with jails holding adults only. The remaining jurisdictions were then selected from eight strata using stratified probability sampling procedures. During the collection process, two new regional jails were added to the sample and one jurisdiction was closed and removed from the sample. Data were estimated for one jurisdiction that did not respond to the survey. See appended table- Sample Design of the 2009 Annual Survey of Jails.

Mode of Data Collection: mailed questionnaires and web option

Type of Research Instrument: Structured

Actions to Minimize Losses: Data were obtained by mailed questionnaires and web form reporting. The ASJ collection began in June of 2009, and ended in December of the same year. The response rate for the survey was 100% for the following critical data items: confined persons (CONFPPOP), number of adult male and adult female inmates (ADMALE, ADFEML), average daily population (ADP), and total rated capacity of jails (RATCAP). Extensive follow-up, including additional mail and fax requests and repeated telephone contacts, resulted in a nearly 100% response rate for the number of juvenile male and juvenile female inmates (JUVMALE, JUVFEML). The response rate was around 90% for data on male and female inmates by conviction status (CONVMALE, CONVFML, UNCONVML, UNCONVFM), and for the number of inmates by race and Hispanic origin (WHITE, BLACK, HISP, AMINDALK, ASIAN, HAWPAC). The response rate for admissions to and releases from jail was around 92%.

Notes

When calculating the total number of persons supervised but not confined, please use the created variable NCONPOP2. Excluded are inmates who participated in weekend programs that allow offenders to serve their sentences of confinement only on weekends (e.g., Friday-Sunday). This was created to reflect reporting changes in specific non-confined variables and will allow the user to reproduce figures found in BJS publications:

NCONPOP2=ELECMON+HOMDTN+COMMSVC+DAYRPTG+PRETSUP+WKPLOG+DRUGPROG+OTRPROG

JUVENILES

State statutes and judicial practices allow juveniles to be incarcerated in adult jails under a variety of circumstances. Because of the differing statutes and practices, however, accurate and comparable data on juveniles are difficult to collect.

Beginning in 1994 the ASJ provided estimates of the total number of jail inmates under age 18, the number held as adults, and the number held as juveniles. New sampling procedures were also introduced in 1994 to minimize the standard errors of these estimates. By stratifying jurisdictions based on the authority to house juveniles, the precision of the juvenile counts was improved. (See methodology section of Prisoner and Jail Inmates at Midyear 1998).

CHANGES TO THE ANNUAL SURVEY OF JAILS FORM

Beginning with the 2003 survey and again in 2009, item 8 of the ASJ instrument regarding inmates held in jail for other authorities was revised to include more detail on the types of Federal authorities that had inmates housed in local jails. Previous versions of the questionnaire asked if the jail jurisdiction being surveyed held inmates for Federal authorities, to include (but not specify counts individually for) those held for the U.S. Marshal's Service, the Federal Bureau of Prisons, U.S. Immigration and Customs Enforcement, Bureau of Indian Affairs, or other-specify. The 2003 through 2009 surveys ask the jail facility to identify how many were held for each of these entities, individually, as opposed to condensing them into a single "Federal authorities" category. Beginning with the 2005 Census of Jail Inmates and in the 2006 Annual Survey of Jails and onward, the new item 'two or more races' was added to the race category.

Notes

AGGREGATING JAIL FACILITY AND RESPONDENT RECORDS INTO JAIL JURISDICTIONS:

In its statistics on jails, BJS reports data for jail jurisdictions. (See, for example table 9 in Jail Inmates at Midyear 2009-Statistical Tables, NCJ 230122, which reports data for the 50 largest jail jurisdictions in the nation.) A jail jurisdiction (typically a county) represents the entity that is responsible for managing the jail facilities under its authority. Jail jurisdictions may contain multiple facilities and/or multiple facility operators (i.e., both county and privately operated facilities). In the Annual Survey of Jails, BJS obtains data from jails responding or reporting units. For example, four reporting units in Allegheny County (PA) represent a single jail jurisdiction. BJS collapses the reporting units into the appropriate single jail jurisdiction.

Jail reporting units are represented by a 21-digit number (FACLID21). The first nine digits in FACLID21 encompass the jurisdiction code which must match in order to collapse the individual file (934 cases) into a single jail jurisdiction file (874 cases). The 9-digit jurisdiction ID variable (JURDID) is included in the dataset. The privately operated facilities (indicated by "8" in the third position in FACLID21) were recoded into the appropriate county or city jurisdiction.

Steps to aggregate the data into 874 jail jurisdictions:

1. Sort file by JURDID.
2. JURDID should be utilized as the break variable in order to match the 9-digit ID. With the exception of the variable WEIGHT, collapsing the data to produce a single jail jurisdiction record is performed by aggregating the absolute sum of the data variables in the file. The WEIGHT variable should be aggregated based on the average (mean) calculation, because the weight for the multiple reporting units reflects the weight given at the jurisdiction level when the sample was drawn. Collapsing the data into the jurisdiction level can be conducted in statistical programs including for example, SPSS (such as the "aggregate" function) or SAS (such as PROC SUMMARY or PROC MEANS function), using the JURDID variable as the classification variable.

- Study 29081 -

Caution: Aggregating the flag items (0=Actual, 1=Estimate, 8=Not applicable and 9=Unknown) for the multiple reporting units into a single jurisdiction may result in numbers that differ from the original flag item. For example, if two reporting units each reported an unknown in the individual file, after aggregating the data, the jurisdiction level flag item will result in the number "18". Also, there are multiple variables in the dataset (i.e., city and facility name, other specifics) which are text and do not aggregate.

BJS METHOD OF CREATING THE JURISDICTION LEVEL FILE; HOW BJS MATCHED THE PRIVATELY OPERATED FACILITIES TO THE APPROPRIATE JAIL JURISDICTION:

The sample for the 2009 Annual Survey of Jails includes all publicly- and privately-operated jails in a sample of jail jurisdictions. BJS obtained data from 934 reporting units that represented 874 jurisdictions in the sample. The sample of jail jurisdictions was distributed as follows:

- 805 jail jurisdictions: Data were obtained from a single county or city government data provider;
- 42 jail jurisdictions: Data were provided by multiple providers from county or city operated facilities; and
- 27 jail jurisdictions: Data were obtained from privately operated facilities.

With the exception of two reporting units, the third position of the JURDID for the single jurisdictions in which data were obtained from multiple respondents was changed to "1", indicating a county government (e.g., 058037037 should be changed to 051037037). For the Marion County Jail II, C.C.A. (158049008) and the Metro Davidson County Detention Facility- C.C.A. (438019003), the third position was changed to "2" which indicates a municipal (city) government.

Note: Two records were not collapsed into a single jail jurisdiction record. These specific jurisdictions have a city or county jail and a regional jail. The regional jail is a separate jurisdiction. To prevent these records from collapsing into a single jurisdiction, BJS changed the JURDID prior to the aggregation step. The records are as follows:

South Fulton Regional Jail- 111060060062000000000 (Changed JURDID to 112060060).

Fulton County- 1110600600600000006600 (Did not change JURDID).

Portsmouth City Jail- 472125001061000000000 (Changed JURDID 471125001).

Hampton Roads Regional Jail- 472125001062000000000 (Did not change JURDID).

Data Appraisal Information

Estimates of Sampling Error:

Because ASJ estimates are based on a sample survey, they may differ from the results of conducting a complete census. Different samples could yield somewhat different results. There are two kinds of error associated with survey data: non-sampling and sampling error.

In any survey the full extent of the non-sampling error is never known. Non-sampling error can be attributed to many sources, such as improper

- Study 29081 -

reporting, differences in the interpretation of questions among respondents, non-response, and data-processing errors.

Sampling error is the variation that may occur by chance because a sample rather than a complete enumeration was conducted. Standard error is a measure of the variation among the estimates from all possible samples, stating the precision with which an estimate from a particular sample approximates the average of all possible samples. The appended standard error table represents the error surrounding the estimates of several key variables.

To generate standard errors, composite variables were created using a standard statistical software package (SPSS). The following created variables consist of:

Gender - Males: ADMALE + JUVMALE

Gender - Females: ADFEML + JUVFEML

Adults: ADMALE + ADFEML

Juveniles - Held as adults: JUVADS

Juveniles - Held as juveniles: JUVMALE +JUVFEML - JUVADS

Race - Other: AMINDALK+ASIAN+HAWPAC

Adult conviction status - Convicted: CONVMALE + CONVFEML

Adult conviction status - Awaiting trial or other unconvicted: UNCONVML + UNCONVFM

After these variables were created the statistical software package SUDAAN was used to generate standard errors. Due to the complex design of the survey, SUDAAN calculated the standard errors while taking into account the stratification of jurisdictions. The data were first sorted to put all jurisdictions into their appropriate stratum. Next, a 'total count' SUDAAN statement was used with the variables Stratum_SUM and PSU_SUM to provide the population (sampling universe) counts and sample counts, respectively. (See program below). Finally the weighted variables were listed in a statement to generate standard errors:

```
proc descript data="g:err07" filetype=ascii means totals design=strwor ;
```

```
  NEST Stratum FACLID21 ;
```

```
  totcnt Stratum_SUM PSU_SUM ;
```

```
  weight Weight ;
```

```
  var CONFPOP TOTPOP WEEKNDR ADP RATCAP ADULT WHITE BLACK HISP ADMALE ADFEML  
  JUVENILE TRUJUV ADULT MALES FEMALES CONVCTD UNCONV OTHRACE ;
```

SUDAAN provided sample estimates and estimated standard errors for selected items. (See appended table - Standard Error Estimates for the Annual Survey of Jails, 2009). To construct a 95% confidence interval for any of the estimates provided, multiply the standard error for an estimate by the

- Study 29081 -

z-score of 1.96 (for a 95% confidence interval). Then take the result and both add and subtract the result to the sample estimate to generate the confidence interval for that estimate. For example, by taking the estimate 767,434 \pm (1.96 \times 4,453), a confidence interval of (758,706 to 776,162) can be constructed. This result shows the range of values the sample estimate would take 95 times out of 100 if different samples were drawn. Similar intervals may be constructed around other survey estimates.

File-by-File Description

File Name:	ASJ 2009 Data
File Dimensions:	<ul style="list-style-type: none">• No. of Cases: 934• No. of Variables: 129• Record Length: 850• Records per Case: 1• Overall No. of Records: 934
Type of File:	ASCII data file
Data Format:	Logical record length
Place of File Production:	Ann Arbor, MI: Inter-university Consortium for Political and Social Research
Extent of Processing Checks:	The data collection was processed according to the standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found, were recoded to missing data values. No consistency checks were performed.

Notes

The variable names used with the data do not adhere to a strict numeric sequence. There are gaps in the numerical order of the variables. However, the names that are used were chosen to conform to recent years of the Annual Survey of Jails.

ICPSR 29081

Annual Survey of Jails: Jail-Level Data, 2009

Variable Description

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

ADP AVERAGE DAILY POPULATION

Location: 610-615 (width: 6; decimal: 0)

Variable Type: numeric

Question: Q11. Between July 1, 2008, and June 30, 2009, what was the average daily population of all jail confinement facilities operated by your jurisdiction? Included are inmates who participated in weekend programs that allow offenders to serve their sentences of confinement only on weekends (e.g., Friday-Sunday).
To calculate the average daily population, add the number of persons for each day during the period July 1, 2008, through June 30, 2009, and divide the result by 365.

Text: Average daily population of all jail confinement facilities for the year ending June 30, 2009

*(Please correct any error in name, mailing address, and ZIP Code)***GENERAL INFORMATION**

- If you have any questions, call the **U.S. Census Bureau** at **1-800-253-2078**, or e-mail **govs.asj@census.gov**.
- Please complete the questionnaire before July 31, 2009 using the web-reporting option (see the web flyer for details), by mailing the completed form to the **U.S. Census Bureau** in the enclosed envelope, or by **FAXing** all pages to **1-888-891-2099**.
- Please retain a copy of the completed form for your records.

What types of facilities are included in this survey?

Confinement facilities usually administered by a local law enforcement agency, intended for adults but sometimes holding juveniles.

- INCLUDE jails and city/county correctional centers.
- INCLUDE special jail facilities (e.g., medical/treatment/release centers, halfway houses, and work farms).
- INCLUDE temporary holding or lockup facilities if they are part of your combined function.
- EXCLUDE temporary holding or lockup facilities that are not part of your combined function from which inmates are usually transferred within 72 hours and not held beyond arraignment. If your only function is a temporary holding or lockup facility, DO NOT complete this form – contact Lisa McNelis at 1-800-253-2078.

Burden statement

Under the Paperwork Reduction Act, we cannot ask you to respond to a collection of information unless it displays a currently valid OMB control number. The burden of this collection is estimated to average 1 1/4 hours per response, including reviewing instructions, searching existing data sources, gathering necessary data, and completing and reviewing this form. Send comments regarding this burden estimate or any aspect of this survey, including suggestions for reducing this burden, to the Director, Bureau of Justice Statistics, 810 Seventh Street, NW, Washington, DC 20531. Do not send your completed form to this address.

REPORTING INSTRUCTIONS

- If the answer to a question is "not available" or "unknown," write "DK" in the space provided.
- If the answer to a question is "not applicable," write "NA" in the space provided.
- If the answer to a question is "none" or "zero," write "0" in the space provided.

- When exact numeric answers are not available, provide estimates and mark (X) in the box beside each figure that is estimated. For example 1,234 ☒

Section I — SUPERVISED POPULATION**1. On June 30, 2009, how many persons under the supervision of your jail jurisdiction were —****a. CONFINED in your jail facilities?**

- INCLUDE persons on transfer to treatment facilities but who remain under your jurisdiction.
- INCLUDE persons held for other jurisdictions.
- INCLUDE persons in community-based programs (e.g., work release, day release, drug/alcohol treatment) who return to jail at night.
- EXCLUDE any persons housed in facilities operated by two or more jurisdictions or those housed in privately operated jails.
- EXCLUDE inmates on AWOL, escape, or long-term transfer to other jurisdictions.
- EXCLUDE inmates being boarded out to another county or held in another facility not operated by your jail jurisdiction.

 ☐
b. Under jail supervision but NOT CONFINED?

- INCLUDE all persons in community-based programs run by your jails (e.g., electronic monitoring, house arrest, community service, day reporting, and work programs).
- EXCLUDE persons on pretrial release who are not in a community based program run by your jails.
- EXCLUDE persons under supervision of probation, parole or other agencies.
- EXCLUDE inmates on weekend programs. Weekend programs allow offenders to serve their sentences of confinement only on weekends (e.g., Friday–Sunday).
- EXCLUDE inmates participating in work release programs who return to the jail at night.

 ☐
c. Total (Sum of items 1a and 1b).
 ☐
2. Of all persons under your jail supervision reported in item 1c, how many were not U.S. citizens?
 Non-US citizens ☐
3. On the weekend prior to June 30, 2009, did your jail jurisdiction have a weekend program?

- Weekend programs allow offenders to serve their sentences of confinement only on weekends (e.g., Friday–Sunday).

 1 ☐ Yes — **How many inmates participated?** ☐

 2 ☐ No
Section II — INMATE COUNTS AND MOVEMENTS**4. On June 30, 2009, how many persons CONFINED in your jail facilities were —**
a. Adult males (age 18 or older). ☐
b. Adult females (age 18 or older). ☐
c. Males under age 18 ☐
d. Females under age 18 ☐
e. TOTAL (Sum of items 4a to 4d should equal item 1a). ☐
5. Of all persons under the age of 18 CONFINED in your jail facilities on June 30, 2009 (items 4c and 4d), how many were tried, or awaiting trial, in adult court?
 Number of persons under age 18 held as adults ☐

6. Of all persons CONFINED in your jail facilities on June 30, 2009, how many were —

- For persons with more than one status, report the status with the most serious offense.
- For convicted inmates include probation and parole violators with no new sentence.

a. Convicted males. ☐

b. Convicted females. ☐

c. Unconvicted males. ☐

d. Unconvicted females. ☐

e. TOTAL (Sum of items 6a to 6d should equal item 1a). ☐

7. On June 30, 2009, how many persons CONFINED in your jail facilities were —

a. White, not of Hispanic origin. ☐

b. Black or African American, not of Hispanic origin. ☐

c. Hispanic or Latino. ☐

d. American Indian/Alaska Native, not of Hispanic origin. ☐

e. Asian, not of Hispanic origin. ☐

f. Native Hawaiian or Other Pacific Islander, not of Hispanic origin. ☐

g. Two or more races, not of Hispanic origin ☐

h. Additional categories in your information system — Specify ☐

i. Not known. ☐

j. TOTAL (Sum of items 7a to 7i should equal item 1a). ☐

8. On June 30, 2009, how many persons CONFINED in your jail facilities were held for —

- For persons with a multiple hold, count them only once with priority being Federal, State, and local.

a. Federal authorities

1. U.S. Marshals Service. ☐

2. Federal Bureau of Prisons. ☐

3. U.S. Immigration and Customs Enforcement (I.C.E.) ☐

4. Bureau of Indian Affairs. ☐

5. Other — Specify ☐

b. State prison authorities

1. For your state. ☐

2. For other states. ☐

c. Other local jail jurisdictions

- EXCLUDE inmates being housed for your own jurisdiction (i.e., your own county/city inmates).

1. Within your state. ☐

2. Outside your state. ☐

d. TOTAL (Sum of items 8a to 8c). ☐

9. During the WEEK of June 24 to June 30, 2009, how many persons were —**a. New admissions to your jail facilities?**

- INCLUDE persons officially booked into and housed in your facility by formal legal document and by the authority of the courts or some other official agency.
- INCLUDE those persons serving a weekend sentence coming into the facility for the first time.
- EXCLUDE returns from escape, work release, medical appointments/treatment facilities, bail and court appearances.

New admissions ☐**b. Final discharges from your jail facilities?**

- INCLUDE all persons released after a period of confinement (e.g., sentence completion, bail/bond releases, other pretrial releases, transfers to other jurisdictions, and deaths).
- INCLUDE those persons completing their weekend sentence leaving the facility for the last time.
- EXCLUDE temporary discharges (e.g., work releases, medical appointments/treatment, to courts, furloughs, day reporters, and transfers to other facilities within your jurisdiction).

Final discharges ☐

10a. During the 30-DAY period from June 1 to June 30, 2009, on what day did your facility hold the greatest number of inmates?

- Peak population should be equal to or greater than the confined inmate population reported in item 1a.

June , 2009**b. How many persons were CONFINED on that day?**Number that day ☐**11. Between July 1, 2008, and June 30, 2009, what was the average daily population of all jail confinement facilities operated by your jurisdiction?**

- Include inmates who participated in weekend programs that allow offenders to serve their sentences of confinement only on weekends (e.g., Friday-Sunday).
- To calculate the average daily population, add the number of persons for each day during the period July 1, 2008, through June 30, 2009, and divide the result by 365.

Average daily population ☐**12. On June 30, 2009, what was the total rated capacity of your jail facilities, excluding separate temporary holding areas?**

- Rated capacity is the maximum number of beds or inmates assigned by a rating official to a facility.
- If rated capacity is not available, estimate by using the design capacity and mark the box.

Rated capacity ☐**Section III — POPULATION SUPERVISED IN THE COMMUNITY****If item 1b equals 0 (zero), STOP HERE.****13. On June 30, 2009, how many persons under your jail supervision who were NOT CONFINED, participated in —**

- EXCLUDE inmates on weekend programs.

a. Electronic monitoring. ☐**b. Home detention without electronic monitoring.** ☐**c. Community service.** ☐**d. Day reporting.** ☐**e. Other pretrial supervision.** ☐**f. Other alternative work programs.** ☐

- EXCLUDE inmates participating in work release programs who return to the jail at night.

g. Alcohol/drug treatment programs. ☐

- EXCLUDE inmates participating in alcohol/drug treatment programs who are confined in the jail.
