Title Statement

Title: Annual Survey of Jails: Jail-Level Data, 2011

Alternative Title: ASJ 2011

Identification No.: 33722

Responsibility Statement

Authoring Entity: United States Department of Justice. Office of Justice Programs. Bureau of Justice Statistics

Production Statement

Producer: Inter-university Consortium for Political and Social Research

Place of Production: Ann Arbor, MI: Inter-university Consortium for Political and Social Research

Series Statement

Series Name: Annual Survey of Jails: Jail-Level Data Series

Series Information:

The Annual Survey of Jails, formerly titled National Survey of Jails, is the only data collection effort that provides an annual source of data on local jails and jail inmates. The series was begun in 1982 by the Bureau of Justice Statistics with data collected by the Bureau of the Census. Local jails are locally-operated correctional facilities that confine persons before or after adjudication. Inmates sentenced to jails usually have a sentence of a year or less, but jails also incarcerate persons in a wide variety of other categories. Data on the size of the jail population and selected inmate characteristics are obtained every five to six years from the Census of Jails. In each of the years between the full censuses, a sample survey of jails is conducted to estimate baseline characteristics of the nation's jails and inmates housed in these jails. Data are supplied on admissions and releases, growth in the number of jail facilities, changes in their rated capacities and level of occupancy, growth in the population supervised in the community, changes in methods of community supervision, and crowding issues. The data are intended for a variety of users, including federal and state agencies, local officials in conjunction with jail administrators, researchers, planners, and the public.

Years Produced: Annually, except every 5 or 6 years when the National Jail Census is produced.

Subject Information

Keyword(s): correctional facilities, correctional system, demographic characteristics, jail inmates, jails, overcrowding effects, population characteristics, probation

Topic Classification(s): Social Institutions and Behavior, Crime and the Criminal Justice System

Abstract

The Annual Survey of Jails (ASJ) is the only data collection effort that provides an annual source of data on local jails and jail inmates. Data on the size of the jail population and selected inmate characteristics are obtained every five to six years from the Census of Jails. In

each of the years between the full censuses, a sample survey of jails is conducted to estimate baseline characteristics of the Nation's jails and inmates housed in these jails. The 2011 Annual Survey of Jails is the 24th such survey in a series begun in 1982.

The ASJ supplies data on characteristics of jails such as admissions and releases, growth in the number of jail facilities, changes in their rated capacities and level of occupancy, growth in the population supervised in the community, changes in methods of community supervision, and crowding issues. The ASJ also provides information on changes in the demographics of the jail population, supervision status of persons held, and a count of Non-U.S. Citizens in custody.

Starting in 2010, BJS enhanced the ASJ survey instruments to address topics on the number of convicted inmates that are unsentenced or sentenced and the number of unconvicted inmates awaiting trial/arraignment, or transfers/holds for other authorities. In order to reduce respondent burden, the ASJ no longer collects data on conviction status by sex. Also new to the survey, data are collected on jails' operational capacity and design capacity. Incorporating enhanced capacity measurements enables BJS to describe more accurately the variation and volatility of inmate bed space and crowding, especially as they relate to safety and security in jails.

To address more directly issues related to overcrowding and safety and security in jails, BJS started collecting data on staff and assaults against staff from the largest jails. In the modifications to the ASJ, starting in 2010, 335 jail jurisdictions (370 respondents) included with certainty (stratum 1 and 12) in the ASJ sample survey were asked to provide additional information (forms CJ-5D or CJ-5DA) on the flow of inmates going through jails and the distribution of time served, staff characteristics and assaults on staff resulting in death, and inmate misconduct.

The data presented in this study were collected in the Annual Survey of Jails, 2011. These data are used to track growth in the number of jails and the capacities nationally, changes in the demographics of the jail population and supervision status of persons held, the prevalence of crowding issues, and a count of non-U.S. citizens within the jail population. The data are intended for a variety of users, including Federal and State agencies, local officials in conjunction with jail administrators, researchers, planners, and the public. The reference date for the survey is June 30, 2011.

Jails are locally-operated correctional facilities that confine persons before or after adjudication. Inmates sentenced to jails usually have a sentence of a year or less, but jails also incarcerate persons in a wide variety of other categories. Local jails:

- receive individuals pending arraignment and hold them awaiting trial, conviction, or sentencing,
- readmit probation, parole, and bail-bond violators and absconders,
- temporarily detain juveniles pending transfer to juvenile authorities,
- · hold mentally ill persons pending their movement to appropriate health facilities,
- hold individuals for the military, for protective custody, for contempt, and for the courts as witnesses,
- · release convicted inmates to the community upon completion of sentence,
- · transfer inmates for Federal, State, or other authorities,
- house inmates for Federal, State, or other authorities because of crowding of their facilities,
- relinquish custody of temporary detainees to juvenile and medical authorities,
- sometimes operate community-based programs as alternatives to incarceration,
- and hold inmates sentenced to short terms (generally less than one year).

Summary Data Description

Time Period: July 1, 2010 - June, 30, 2011

Date(s) of Collection: June, 2011 - November, 2011

Country: United States

Geographic Coverage: United States

Geographic Unit: City and County

Unit of Analysis: Jail facilities

Universe: All sampled jail jurisdictions (i.e., counties, municipalities, boroughs, etc.) identified from the 2005 Census of Jail Inmates.

Kind of Data: Survey data

Notes

DEFINITION OF TERMS

The following are terms used in the codebook:

- Local jail: A confinement facility usually administered by a local law enforcement agency, intended for adults but sometimes also
 containing juveniles, that holds persons detained pending adjudication and/or persons committed after adjudication for sentences
 usually a year or less. Excluded from the survey are temporary holding or lockup facilities that are not part of a combined function of
 a jail jurisdiction, from which inmates are usually transferred within 72 hours and not held beyond arraignment.
- Jurisdiction: A county (parish in Louisiana), municipality, township, or regional authority that administers one or more local jails.
- · Regional jail: A jail in which two or more jurisdictions have a formal agreement to operate the facility.
- Juvenile: A person subject to the exercise of juvenile court jurisdiction for the purposes of adjudication and treatment based on the age
 and offense limitations as defined by state law. For the purposes of this report, a person of juvenile age is considered a juvenile even
 though they may be tried as an adult in criminal court.
- Adult criminal offender: A person subject to the original jurisdiction of the criminal court rather than the juvenile court because at the time of the offense the person was above a statutory age limit.
- Average daily population: To calculate the average daily population respondents were instructed to add the number of persons for each
 day during the period July 1, 2010 to June 30, 2011, and to divide the result by 365.

Notes

JAIL IDENTIFICATION (JURDID) AND THE FEDERAL INFORMATION PROCESSING STANDARDS (FIPS CODE)

The first 9 digits of the jail identification code (JURDID) are the government identification codes that the U.S. Census Bureau uses to identify governments in the United States. The GID maintains the name and unique identification code for all local governments in the United States, based on the 2009 Census of Governments and is the Census Bureau's master list of all governments in the United States. The GID code identifies the location of governments, whether they are state, county, city, place, or municipality.

An alternative scheme for identifying places is the Federal Information Processing Standards (or FIPS) codes, which are a standardized set of codes issued by the National Institute of Standards and Technology to ensure uniform identification of geographic entities throughout all federal government agencies. The entities covered under the FIPS include states and equivalent entities, counties, named populated and related location entities (such as places and county subdivisions) as well as American Indian and Alaska Native areas. More information about FIPS codes as well as the identifications of areas under FIPS can be found at http://www.census.gov/geo/www/fips/fips.html.

The GID code is not equivalent to the FIPS codes. The Census Bureau provides a crosswalk between the GID codes and FIPS codes through its integrated directory, which can be found at http:// harvester.census.gov/gid/gid 07/options.html.

Methodology and Processing

Data Collection Methodology

Time Method: Cross-section

Data Collector: United States Department of Commerce. Bureau of the Census

Sampling Procedure:

In years between the complete census of local jails, BJS conducts the Annual Survey of Jails (ASJ). The ASJ is a sample survey of local jails used to estimate the number and characteristics of local inmates nationwide. For the 2011 ASJ, the U.S. Census Bureau, as the collection agent, drew a sample of 873 jail jurisdictions represented by 930 jail facilities (also referred to as reporting units). This sample represents over 2,800 jail jurisdictions nationwide. Local jail jurisdictions include counties (parishes in Louisiana) or municipal governments that administer one or more local jails. The 2011 ASJ sample included all jails with certainty (67) that were operated jointly by two or more jurisdictions, or multi-jurisdictional jails. Other jail jurisdictions included with certainty (268) were those that-

-held juvenile inmates at the time of the 2005 Census of Jail Inmates and had an average daily population of 500 or more inmates during the 12 months ending June 30, 2005.

-held only adult inmates and had an average daily population of 750 or more.

Certainty jails jurisdiction in the survey received forms CJ-5D (Certainty Jurisdictions-Central data reporter) or CJ-5DA (Multi-Jurisdiction facilities and privately operated facilities in jurisdictions included with certainty in the Annual Survey of Jails).

The remaining jurisdictions were stratified into two groups: jurisdictions with jails holding at least one juvenile on June 30, 2005, and jails holding only adults on that date. Using stratified random sampling, 538 jurisdictions were selected from eight strata based on the two conditions enumerated above and four strata based on the average daily jail inmate population during 2005. The average daily jail inmate population was derived from the 2005 Census of Jail Inmates. These jail jurisdictions received forms CJ-5 (County/City operated) or CJ-5A (Private Facilities operating for County/City jail jurisdictions).

Mode of Data Collection: mailed questionnaires and web option

Type of Research Instrument: Structured

Actions to Minimize Losses:

Data were obtained by mailed questionnaires and web form reporting. The ASJ collection began in June of 2011, and ended in November of the same year.

BJS has consistently maintained high rates of response to the ASJ, typically 100% survey response rate and between 90%-100% item response rate. In an effort to minimize respondent burden and maximize response, the data collection plan allows for the jail respondents to submit data by mailing their reply in a postage-paid envelope or by fax, in addition to the internet-based reporting system (which BJS implemented and redesigned in 2011).

To maximize the accuracy of survey, at the direction of BJS, data collection staff conduct out-of-range analysis of critical items and use the results from this analysis to prioritize follow-up contacts. Follow-up telephone calls and faxes to non respondents are used to encourage high response rates. These methods have proved effective in reaching the nearly 100% response rate while minimizing missing data.

The response rate for the survey was 100% for the following critical data items from responding jail jurisdictions (839): confined persons (CONFPOP), average daily population (ADP) and the total rated capacity (RATED). Extensive follow-up, including additional mail and fax requests and repeated telephone contacts, resulted in a nearly100% response rate for the number of adult male and adult female inmates (ADULTM, ADULTF) and for the number of juvenile male and juvenile female inmates (JUVM, JUVF). The response rate was around 91% for data on conviction status (CONV, UNCONV), and around 98% for the number of inmates by race and Hispanic origin (WHITE, BLACK, HISP, AIAN, ASIAN, NHOPI). The response rate for admissions to and releases from jail was around 96%.

In the modifications to the ASJ (forms CJ-5DA), starting in 2010 and again in 2011, 335 jail jurisdictions (370 respondents) included with certainty (stratum 1 and 12) in the ASJ sample survey were asked to provide additional information on the flow of inmates going through jails and the distribution of time served, staff characteristics and assaults on staff resulting in death, and inmate misconduct. The item response rate varied again for 2011 based on 328 jail jurisdictions (366 respondents) reporting data:

95% for staff by occupation (CORRSTAFF, OTHERSTAFF);

66% for length of stay, based on releases from jail (series of questions starting with CONVII10A, UNCONVII10A);

99% for assaults on facility staff and staff deaths (ASSAULTSTAFFYN, ASSAULTCORR, ASSAULTOTRSTAFF, DEATHSTAFFYN, DEATHCORR, DEATHCOR

79% for inmate misconduct (PHYSASSAULT, DRUGVIO, ALCOVIO, WEAPON, STOLENPROP, ESCAPE, OTHERMAJVIO).

Notes

When calculating the total number of persons supervised but not confined, please use the created variable NCONPOP2. Excluded are inmates who participated in weekend programs that allow offenders to serve their sentences of confinement only on weekends (e.g., Friday-Sunday). This was created to reflect reporting changes in specific non-confined variables and will allow the user to reproduce figures found in BJS publications:

NCONPOP2=ELECMON+HOMDTN+COMMSVC+DAYRPTG+PRETSUP+WKPROG+DRUGPROG+OTRPROG

JUVENILES

State statutes and judicial practices allow juveniles to be incarcerated in adult jails under a variety of circumstances. Because of the differing statutes and practices, however, accurate and comparable data on juveniles are difficult to collect.

Beginning in 1994 the ASJ provided estimates of the total number of jail inmates under age 18, the number held as adults, and the number held as juveniles. New sampling procedures were also introduced in 1994 to minimize the standard errors of these estimates. By stratifying jurisdictions based on the authority to house juveniles, the precision of the juvenile counts was improved. (See methodology section of Prisoner and Jail Inmates at Midyear 1998).

CHANGES TO THE ANNUAL SURVEY OF JAILS FORM

Beginning with the 2003 survey and continued in 2011, item 5 (item 8 in 2003) of the ASJ instrument regarding inmates held in jail for other authorities was revised to include more detail on the types of Federal authorities that had inmates housed in local jails. Previous versions of the questionnaire asked if the jail jurisdiction being surveyed held inmates for Federal authorities, to include (but not specify counts individually for) those held for the U.S. Marshal's Service, the Federal Bureau of Prisons, U.S. Immigration and Customs Enforcement, Bureau of Indian Affairs, or other-specify. The 2003 through 2011 surveys ask the jail facility to identify how many were held for each of these entities, individually, as opposed to condensing them into a single "Federal authorities" category. Beginning with the 2005 Census of Jail Inmates and in the 2006 Annual Survey of Jails and onward, the new item 'two or more races' was added to the race category.

BJS has actively engaged its stakeholder communities in an effort to assess their needs for data and information about local jails. Through a series of discussions and focus groups at professional conferences of jail administrators and in workgroup meetings with jail and county association members, BJS has discussed its portfolio of work on local jails to assess the extent to which it is meeting the needs of stakeholder communities and addressing key or emerging issues that currently are not met by its surveys. Jail administrators and other users of BJS jail data consistently identified several issues that are important for them to know about jails.

Starting in 2010, BJS enhanced the ASJ survey instruments to address these important topics. Included is data on the number of convicted inmates that are unsentenced or sentenced and the number of unconvicted inmates awaiting trial/arraignment, or transfers/holds for other authorities. In order to reduce respondent burden, ASJ no longer collects data on conviction status by sex.

Prior to 2010, BJS collected and reports data on rated capacity and it reports the percent of capacity occupied at midyear, where capacity is defined as "rated capacity." Rated capacity is the number of inmates (beds) that a facility could hold independently of programs as defined by a rating official. Other measures of capacity are useful, as rated capacity does not necessarily reflect the space available to provide treatment, services, or programs.

New to the ASJ collection, beginning in 2010, is the operational capacity that indicates the amount of space that jails have to run various programs, and this number can change by relatively large amounts from year-to-year as budgets change. Measuring crowding in relation to budgeted or operational capacity gives an indication of the programming available for inmates. Finally, design capacity-the number of beds available in the design of a facility-gives a measure of the underlying amount of space available for modification and redesign. Incorporating enhanced capacity measurements enables BJS to describe more accurately the variation and volatility of inmate bed space and crowding, especially as they relate to safety and security in jails.

To address more directly issues related to overcrowding and safety and security in jails, BJS started collecting data on staff and assaults against staff from the largest jails. In the modifications to the ASJ, starting in 2010, and again in 2011, jail jurisdictions (335) included with certainty (stratum 1 and 12) in the ASJ sample survey were asked to provide additional information on the flow of inmates going through jails and the distribution of time served, staff characteristics and assaults on staff resulting in death, and inmate misconduct.

Notes

AGGREGATING JAIL FACILITY AND RESPONDENT RECORDS INTO JAIL JURISDICTIONS:

In its statistics on jails, BJS reports data for jail jurisdictions. (See, for example table 9 in Jail Inmates at Midyear 2010-Statistical Tables, NCJ 233431, which reports data for the 50 largest jail jurisdictions in the nation.) A jail jurisdiction (typically a county) represents the entity that is responsible for managing the jail facilities under its authority. Jail jurisdictions may contain multiple facilities and/or multiple facility operators (i.e., both county and privately operated facilities). In the Annual Survey of Jails, BJS obtains data from jails responding or reporting units. For example, four reporting units in Allegheny County (PA) represent a single jail jurisdiction. BJS collapses the reporting units into the appropriate single jail jurisdiction.

Jail reporting units are represented by a 21-digit number (FACLID21). The first nine digits in FACLID21 encompass the jurisdiction code which must match in order to collapse the individual file into a single jail jurisdiction file. The 9-digit jurisdiction ID variable (JURDID) is included in the dataset. The privately operated facilities (indicated by "8" in the third position in FACLID21) were recoded into the appropriate county or city jurisdiction.

Steps to aggregate the data into jail jurisdictions:

- 1. Sort file by JURDID.
- 2. JURDID should be utilized as the break variable in order to match the 9-digit ID. With the exception of the variable FINALWEIGHT, collapsing the data to produce a single jail jurisdiction record is performed by aggregating the absolute sum of the data variables in the file. The FINALWEIGHT variable should be aggregated based on the average (mean) calculation, because the weight for the multiple reporting units reflects the weight given at the jurisdiction level when the sample was drawn. Collapsing the data into the jurisdiction level can be conducted in statistical programs including for example, SPSS (such as the "aggregate" function) or SAS (such as PROC SUMMARY or PROC MEANS function), using the JURDID variable as the classification variable.

Caution: Aggregating the flag items (0=Actual, 1=Estimate, 8=Not applicable and 9=Unknown) for the multiple reporting units into a single jurisdiction may result in numbers that differ from the original flag item. For example, if two reporting units each reported an unknown in the individual file, after aggregating the data, the jurisdiction level flag item will result in the number "18". Also, there are multiple variables in the dataset (i.e., city and facility name, other specifies) which are text and do not aggregate.

BJS METHOD OF CREATING THE JURISDICTION LEVEL FILE; HOW BJS MATCHED THE PRIVATELY OPERATED FACILITIES TO THE APPROPRIATE JAIL JURISDICTION:

The sample for the 2011 Annual Survey of Jails includes all publicly- and privately-operated jails in a sample of jail jurisdictions. BJS obtained data from 892 (including estimates for four nonrespondents) reporting units that represented 839 jurisdictions in the sample.

With the exception of two reporting units, the third position of the JURDID for the single jurisdictions in which data were obtained from multiple respondents was changed to "1", indicating a county government (e.g., 058037037 should be changed to 051037037). For the Marion County Jail II, C.C.A. (158049008) and the Metro Davidson County Detention Facility- C.C.A. (438019003), the third position was changed to "2" which indicates a municipal (city) government.

Note: Two records were not collapsed into a single jail jurisdiction record. These specific jurisdictions have a city or county jail and a regional jail. The regional jail is a separate jurisdiction. To prevent these records from collapsing into a single jurisdiction, BJS changed the JURDID prior to the aggregation step. The records are as follows:

South Fulton Regional Jail- 111060060062000000000 (Changed JURDID to 112060060).

Fulton County- 1110600600600000006600 (Did not change JURDID).

Portsmouth City Jail- 472125001061000000000 (Changed JURDID 471125001).

Hampton Roads Regional Jail- 47212500106200000000 (Did not change JURDID).

Data Appraisal Information

Response Rate:

Response rate, nonresponse adjustment, and out-of scope jail facilities

The 2011 ASJ sampling frame comprised 926 reporting units. Ninety-six percent (or 888) of the 926 individual reporting units responded to the 2011 data collection, and 38 individual reporting units did not respond to the survey. The sampling frame initially comprised 930 units. However, four units were out-of-scope for the 2011 data collection because they had closed, either permanently or temporarily, which resulted in the sampling frame of 926 active respondents.

To address more directly issues related to overcrowding and safety and security in jails, BJS started collecting data in 2010, and again in 2011, on staff and assaults against staff from the largest jails. In the modifications to the ASJ (forms CJ-5DA), starting in 2010,

a 335 jail jurisdictions (370 respondents) included with certainly in the ASJ sample survey were asked to provide additional information on the flow of inmates going through jails and the distribution of time served, staff characteristics and assaults on staff resulting in death, and inmate misconduct. Nearly all (328 or 98%) of the jail jurisdictions responded.

For the 2011 ASJ collection year, BJS implemented nonresponse weight adjustment procedures to account for missing data and to create the calculated variable, FINALWEIGHT. However, prior to implementing the plan, data were estimated for four nonrespondents. After November 2, 2011, BJS implemented the nonresponse weight adjustment procedure to account for 34 respondents that did not participate.

NOTE: Enhanced data items in Section IV - STAFF SAFETY AND SECURITY of forms CJ-5D or CJ-5DA are collected from certainty jail jurisdictions that are self-representing and should not be weighted. However, all other items in the survey for certainty jail jurisdictions are subject to FINALWEIGHT.

Nonresponse weight adjustment

The nonresponse weighting adjustment for the ASJ is handled in multiple steps. The first step is to set a respondent indicator and an active indicator for each reporting unit. The next step is to calculate the nonresponse weighting adjustment factor within sample stratum.

Respondent Indicators

Note: Please interpret text after the " " as a subscript.

The respondent reporting unit indicator JAILR_hij is set for each individual reporting unit j in jurisdiction i in stratum h on the file, based on the status of the individual reporting unit

$$\label{eq:JAILR} \textit{JAILR}_{\textit{hij}} = \begin{cases} 1 \; \textit{if respondent or using prior year data} \\ 0 \; \textit{if nonrespondent, closed, or out - of - scope}. \end{cases}$$

The respondent jurisdiction indicator JURISR_hi is set for each jurisdiction i in stratum h on the file, based on the value of JAILR_hij for the reporting units within the jurisdiction.

$$JURISR_{hi} = \begin{cases} 1 & \text{if } \sum_{j=1}^{n_i} JAILR_{hij} \ge 1 \\ 0 & \text{otherwise} \end{cases}$$

Active Indicators

The active reporting unit indicator JAILA_hij is set for each individual reporting unit j in jurisdiction i in stratum h on the file, based on the status of the individual reporting unit.

$$\label{eq:jailant} \textit{JAILA}_{\textit{hij}} = \begin{cases} 1 \; \textit{if respondent, using prior year data, or nonrespondent} \\ 0 \; \textit{if closed or out-of-scope.} \end{cases}$$

The active jurisdiction indicator JURISA_hi is set for each jurisdiction i in stratum h on the file, based on the value of JAILA_hij for the reporting units within the jurisdiction.

$$JURISA_{hi} = \begin{cases} 1 & \text{if } \sum_{j=1}^{n_i} JAILA_{hij} \ge 1\\ 0 & \text{otherwise.} \end{cases}$$

Nonresponse weighting adjustment factor

The nonresponse weighting adjustment factor is calculated within each stratum. We use the sample weights in the nonresponse adjustment factor. The nonresponse weighting adjustment factor F_2h is calculated as

$$F_{2h} = \frac{\sum_{i=1}^{n_h} w_{hi} \times JURISA_{hi}}{\sum_{i=1}^{n_h} w_{hi} \times JURISR_{hi}}$$

Where

n_h = number of jurisdictions in stratum h,

W_hi = sample weight for jurisdiction i in stratum h.

Final weight

The final weight FW_hij for each individual reporting unit on the 2011 ASJ data file is calculated as

$$FW_{hij} = w_{hij} \times F_{2h} \times JAILR_{hij}$$

where W_hij= sample weight for reporting unit j in jurisdiction i in stratum h. JAILR_hij is used to set the final weight to 0 for units that are closed, out-of-scope, or nonrespondents.

Estimates of Sampling Error:

Because ASJ estimates are based on a sample survey, they may differ from the results of conducting a complete census. Different samples could yield somewhat different results. There are two kinds of error associated with survey data: non-sampling and sampling error.

In any survey the full extent of the non-sampling error is never known. Non-sampling error can be attributed to many sources, such as improper reporting, differences in the interpretation of questions among respondents, non-response, and data-processing errors.

Sampling error is the variation that may occur by chance because a sample rather than a complete enumeration was conducted. Standard error is a measure of the variation among the estimates from all possible samples, stating the precision with which an estimate from a particular sample approximates the average of all possible samples. The appended standard error table represents the error surrounding the estimates of several key variables.

To generate standard errors, composite variables were created using a standard statistical software package (SPSS). The following created variables consist of:

SFX - Males: ADUITM + JUVM

SEX - Females: ADULTF + JUVF

Adults: ADULTM + ADULTF

Juveniles - Held as adults: ADLTJUV

Juveniles - Held as juveniles: JUVM +JUVF - ADLTJUV

Race - Other: AIAN+ASIAN+NHOPI

Conviction status - Convicted: CONV

Conviction status - Awaiting trial or other unconvicted: UNCONV

After these variables were created the statistical software package SUDAAN was used to generate standard errors. Due to the complex design of the survey, SUDAAN calculated the standard errors while taking into account the stratification of jurisdictions. The data were

first sorted to put all jurisdictions into their appropriate stratum. Next, a 'total count' SUDAAN statement was used with the variables Stratum_SUM and PSU_SUM to provide the population (sampling universe) counts and sample counts, respectively. (See program below). Finally the weighted variables were listed in a statement to generate standard errors:

proc descript data="g:err11" filetype=ascii means totals design=strwor;

NEST Stratum;

totcnt Stratum SUM;

weight finalweight:

var CONFPOP TOTPOP WEEKN ADP RATED WHITE BLACK HISP ADULTM ADULTF TJUV JUVJUV ADULT TMALE TFEMALE CONVCTD UNCONV OTHERRACEE ;

SUDAAN provided sample estimates and estimated standard errors for selected items. (See appended table - Standard Error Estimates for the Annual Survey of Jails, 2011). To construct a 95% confidence interval for any of the estimates provided, multiply the standard error for an estimate by the z-score of 1.96 (for a 95% confidence interval). Then take the result and both add and subtract the result to the sample estimate to generate the confidence interval for that estimate. For example, by taking the estimate 735,601 +- (1.96 x 5,638), a confidence interval of (723,512 to 747,690) can be constructed. This result shows the range of values the sample estimate would take 95 times out of 100 if different samples were drawn. Similar intervals may be constructed around other survey estimates.

Citation Requirement: Publications based on ICPSR data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications.

Deposit Requirement: To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, users of ICPSR data are requested to send to ICPSR bibliographic citations for each completed manuscript or thesis abstract. Visit the ICPSR Web site for more information on submitting citations.

Data Files Description

File-by-File Description

File Name: ASJ 2011 Data

File Dimensions:No. of Cases: 892No. of Variables: 200Record Length: 1,422

Data Format: Logical record length

Type of File: ASCII data file

Place of File Production: Ann Arbor, MI: Inter-university Consortium for Political and Social Research

Extent of Processing Checks: The data collection was processed according to the standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found, were recoded to missing data values. No consistency checks were performed.

Notes

Variable WEIGHT is for reference only and it is not supposed to be used to calculate the national estimate. Users can use variable FINALWEIGHT for that purpose. See "Nonresponse weight adjustment" for more information.

Only the certainty jail jurisdictions (stratum 1 and 12) in the ASJ sample survey (2010-current) were asked to provide additional information (forms CJ-5D or CJ-5DA) on the flow of inmates going through jails and the distribution of time served, staff characteristics and assaults on staff resulting in death, and inmate misconduct. A weight should not be applied to these items because the responses are self-represented.

ICPSR 33722

Annual Survey of Jails: Jail-Level Data, 2011

ASJ 2011 Data

Variable Description

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

9	Don't know

CONVSENT - CONVICTION STATUS: CONVICTED: SENTENCED INMATES

Location: 543-548 (width: 6; decimal: 0)

Variable Type: numeric

Question:

II.3. Of all persons CONFINED in your jail facilities on June 30, 2011, how many were -

a. Convicted - 2. Sentenced inmates

CONVSENTF - CONVICTION STATUS: CONVICTED: SENTENCED INMATES FLAG

Location: 549-549 (width: 1; decimal: 0)

Variable Type: numeric

Value	Label
0	Actual
1	Estimated
8	Not applicable
9	Don't know

UNCONV - CONVICTION STATUS: TOTAL UNCONVICTED

Location: 550-555 (width: 6; decimal: 0)

Variable Type: numeric

Question:

II.3. Of all persons CONFINED in your jail facilities on June 30, 2011, how many were -

b. Unconvicted

UNCONVF - CONVICTION STATUS: TOTAL UNCONVICTED FLAG

Location: 556-556 (width: 1; decimal: 0)

Value	Label
0	Actual

Value	Label
1	Estimated
8	Not applicable
9	Don't know

UNCONVTRIAL - CONVICTION STATUS: UNCONVICTED: AWAITING TRIAL/ARRAIGNMENT

Location: 557-562 (width: 6; decimal: 0)

Variable Type: numeric

Question:

II.3. Of all persons CONFINED in your jail facilities on June 30, 2011, how many were -

b. Unconvicted - 1. Awaiting trial/arraignment

UNCONVTRIALF - CONVICTION STATUS: UNCONVICTED: AWAITING TRIAL/ARRAIGNMENT FLAG

Location: 563-563 (width: 1; decimal: 0)

Variable Type: numeric

Value	Label
0	Actual
1	Estimated
8	Not applicable
9	Don't know

UNCONVHOLD - CONVICTION STATUS: UNCONVICTED: AWAITING TRANSFER/HOLD FOR OTHER AUTHORITIES

Location: 564-569 (width: 6; decimal: 0)

Variable Type: numeric

Question:

II.3. Of all persons CONFINED in your jail facilities on June 30, 2011, how many were -

b. Unconvicted - 2. Awaiting transfer/hold for other authorities

UNCONVHOLDF - CONVICTION STATUS: UNCONVICTED: AWAITING TRANSFER/HOLD FOR OTHER AUTHORITIES FLAG

Location: 570-570 (width: 1; decimal: 0)

0	Actual
1	Estimated
8	Not applicable
9	Don't know

CONVNCNF - CONVICTED NONCONFINED

Location: 1286-1291 (width: 6; decimal: 0)

Variable Type: numeric

Question:

III.3. Of all persons under your jail supervision who were NOT CONFINED on June 30, 2011, how many were --

a. convicted

CONVNCNFF - CONVICTED NONCONFINED FLAG

Location: 1292-1292 (width: 1; decimal: 0)

Variable Type: numeric

Value	Label
0	Actual
1	Estimated
8	Not applicable
9	Don't know

UNCNVNCF - UNCONVICTED NONCONFINED

Location: 1293-1298 (width: 6; decimal: 0)

Variable Type: numeric

Question:

III.3. Of all persons under your jail supervision who were NOT CONFINED on June 30, 2011, how many were --

b. Unconvicted

UNCNVNCFF - UNCONVICTED NONCONFINED FLAG

Location: 1299-1299 (width: 1; decimal: 0)

Variable Type: numeric

Value	Label
0	Actual
1	Estimated
8	Not applicable
9	Don't know

TOTCNVST - TOTAL NONCONFINED CONVICTION STATUS

Location: 1300-1305 (width: 6; decimal: 0)

Variable Type: numeric

Question:

III.3. Of all persons under your jail supervision who were NOT CONFINED on June 30, 2011, how many were --

c. TOTAL (Sum of items III.3a and III.3b should equal item I.1b)

TOTCNVSTF - TOTAL NONCONFINED CONVICTION STATUS FLAG

Location: 1306-1306 (width: 1; decimal: 0)

Variable Type: numeric

Value	Label
0	Actual
1	Estimated
8	Not applicable
9	Don't know

CORRSTAFF - S4QIV.1A: NUMBER OF STAFF: CORRECTIONAL OFFICERS

Location: 1307-1312 (width: 6; decimal: 0)

Variable Type: numeric

Question:

Section IV -- STAFF SAFETY AND SECURITY

Count each employee only once. Classify employees with multiple functions by the function performed most frequently. INCLUDE only payroll and nonpayroll staff. EXCLUDE staff paid through contracual agreements and community voluneers.

IV.1. On June 30, 2011, how many staff employed by your jail were -

a. Correctional Officers (Deupties, monitors, and other custody staff who spend more than 50% of their time with the incarcerated population.)

Value	Label
-9 (M)	Blank

CORRSTAFFF - NUMBER OF STAFF: CORRECTIONAL OFFICERS FLAG

GENERAL INFORMATION

- If you have any questions, call the U.S. Census Bureau at 1-800-253-2078, or e-mail govs.asj@census.gov.
- Please complete the questionnaire before July 31, 2011 using the web-reporting option (see the web flyer for details), by mailing the completed form to the U.S. Census Bureau in the enclosed envelope, or by FAXing all pages to 1-888-891-2099.
- Please retain a copy of the completed form for your records.

What types of facilities are included in this survey?

Confinement facilities usually administered by a local law enforcement agency, intended for adults but sometimes holding juveniles.

- INCLUDE jails and city/county correctional centers.
- INCLUDE special jail facilities (e.g., medical/treatment/release centers, halfway houses, and work farms).
- INCLUDE temporary holding or lockup facilities if they are part of your combined function.
- EXCLUDE temporary holding or lockup facilities that are not part of your combined function from which inmates are usually transferred within 72 hours and not held beyond arraignment. If your only function is a temporary holding or lockup facility, DO NOT complete this form contact Jennifer Deppe at 1–800–253–2078.
- EXCLUDE facilities reporting to form CJ-5D, which collects data from jail jurisdictions that are selected with certainty to participate in the Annual Survey of Jails.

Burden statement

Under the Paperwork Reduction Act, we cannot ask you to respond to a collection of information unless it displays a currently valid OMB control number. The burden of this collection is estimated to average 1 1/4 hours per response, including reviewing instructions, searching existing data sources, gathering necessary data, and completing and reviewing this form. Send comments regarding this burden estimate or any aspect of this survey, including suggestions for reducing this burden, to the Director, Bureau of Justice Statistics, 810 Seventh Street, NW, Washington, DC 20531. Do not send your completed form to this address.

REPORTING INSTRUCTIONS

- If the answer to a question is "not available" or "unknown," write "DK" in the space provided.
- If the answer to a question is "not applicable," write "NA" in the space provided.
- If the answer to a question is "none" or "zero," write "0" in the space provided.
- When exact numeric answers are not available, provide estimates and mark (X) in the box beside each figure that is estimated. For example 1,234 ∑

Section I — SUPERVISED POPULATION

- I.1. On June 30, 2011, how many persons under the supervision of your jail jurisdiction were
 - a. CONFINED in your jail facilities?
 - INCLUDE persons on transfer to treatment facilities but who remain under your jurisdiction.
 - INCLUDE persons held for other jurisdictions.
 - INCLUDE persons in community-based programs (e.g., work release, day release, drug/alcohol treatment) who return to jail at night.
 - EXCLUDE any persons housed in facilities operated by two or more jurisdictions or those housed in privately operated jails.
 - EXCLUDE inmates on AWOL, escape, or long-term transfer to other jurisdictions.
 - EXCLUDE inmates being boarded out to another county or held in another facility not operated by your jail jurisdiction.

b. Under jail supervision but NOT CONFINED?

- INCLUDE all persons in community-based programs run by your jails (e.g., electronic monitoring, house arrest, community service, day reporting, and work programs).
- EXCLUDE persons on pretrial release who are not in a community based program run by your jails.
- EXCLUDE persons under supervision of probation, parole or other agencies.
- EXCLUDE inmates on weekend programs.
 Weekend programs allow offenders to serve their sentences of confinement only on weekends (e.g., Friday–Sunday).
- EXCLUDE inmates participating in work release programs who return to the jail at night.

GENERAL INFORMATION

- If you have any questions, call the U.S. Census Bureau at 1-800-253-2078, or e-mail govs.asj@census.gov.
- Please complete the questionnaire before July 31, 2011 using the web-reporting option (see the web flyer for details), by mailing the completed form to the U.S. Census Bureau in the enclosed envelope, or by FAXing all pages to 1-888-891-2099.
- Please retain a copy of the completed form for your records.

What types of facilities are included in this survey?

Confinement facilities in jurisdictions included with certainty in the Annual Survey of Jails. Confinement facilities are usually administered by a local law enforcement agency, intended for adults but sometimes holding juveniles.

Confinement facilities

- INCLUDE jails and city/county correctional centers.
- INCLUDE special jail facilities (e.g., medical/treatment/release centers, halfway houses, and work farms).
- INCLUDE temporary holding or lockup facilities if they are part of your combined function.
- EXCLUDE temporary holding or lockup facilities that are not part of your combined function from which inmates are
 usually transferred within 72 hours and not held beyond arraignment. If your only function is a temporary holding or
 lockup facility, DO NOT complete this form contact Jennifer Deppe at 1–800–253–2078.

Certainty jurisdictions

- INCLUDE facilities in jail jurisdictions that held juvenile inmates at the time of the 2005 Census of Jail Inmates and had an average daily population of 500 or more inmates during the 12 months ending June 30, 2005.
- INCLUDE facilities in jail jurisdictions that held only adult inmates and had an average daily population of 750 or more at the time of the 2005 Census of Jail Inmates.

Burden statement

Under the Paperwork Reduction Act, we cannot ask you to respond to a collection of information unless it displays a currently valid OMB control number. The burden of this collection is estimated to average 2 hours per response, including reviewing instructions, searching existing data sources, gathering necessary data, and completing and reviewing this form. Send comments regarding this burden estimate or any aspect of this survey, including suggestions for reducing this burden, to the Director, Bureau of Justice Statistics, 810 Seventh Street, NW, Washington, DC 20531. Do not send your completed form to this address.

REPORTING INSTRUCTIONS

- If the answer to a question is "not available" or "unknown," write "DK" in the space provided.
- If the answer to a question is "not applicable," write "NA" in the space provided.
- If the answer to a question is "none" or "zero," write "0" in the space provided.
- When exact numeric answers are not available, provide estimates and mark (X) in the box beside each figure that is estimated. For example 1,234 ∑

Section I — SUPERVISED POPULATION

- I.1. On June 30, 2011, how many persons under the supervision of your jail jurisdiction were
 - a. CONFINED in your jail facilities?
 - INCLUDE persons on transfer to treatment facilities but who remain under your jurisdiction.
 - INCLUDE persons held for other jurisdictions.
 - INCLUDE persons in community-based programs (e.g., work release, day release, drug/alcohol treatment) who return to jail at night.
 - EXCLUDE any persons housed in facilities operated by two or more jurisdictions or those housed in privately operated jails.
 - EXCLUDE inmates on AWOL, escape, or long-term transfer to other jurisdictions.
 - EXCLUDE inmates being boarded out to another county or held in another facility not operated by your jail jurisdiction.

b. Under jail supervision but NOT CONFINED?

- INCLUDE all persons in community-based programs run by your jails (e.g., electronic monitoring, house arrest, community service, day reporting, and work programs).
- EXCLUDE persons on pretrial release who are not in a community based program run by your jails.
- EXCLUDE persons under supervision of probation, parole or other agencies.
- EXCLUDE inmates on weekend programs.
 Weekend programs allow offenders to serve their sentences of confinement only on weekends (e.g., Friday–Sunday).
- EXCLUDE inmates participating in work release programs who return to the jail at night.

GENERAL INFORMATION

- If you have any questions, call the U.S. Census Bureau at 1-800-253-2078, or e-mail govs.asj@census.gov.
- Please complete the questionnaire before July 31, 2011 using the web-reporting option (see the web flyer for details), by mailing the completed form to the U.S. Census Bureau in the enclosed envelope, or by FAXing all pages to 1–888–891–2099.
- Please retain a copy of the completed form for your records.

What types of facilities are included in this survey?

Multi-Jurisdiction facilities and privately operated facilities in jurisdictions included with certainty in the Annual Survey of Jails. These facilities are intended for adults but sometimes hold juveniles.

For Multi-Jurisdiction facility

Confinement facilities including detention centers, jails, and other correctional facilities administered by two or more governments (or a board composed of representatives from two or more governments) included with certainty in the Annual Survey of Jails.

- INCLUDE regional jails or city/county correctional centers.
- INCLUDE special jail facilities (e.g., medical/treatment/release centers, halfway houses, and work farms).
- INCLUDE inmates held for jurisdictions, other than the participating jurisdictions.

For Privately Operated facility

Privately owned or operated confinement facilities in jurisdictions included with certainty in the Annual Survey of Jails, including detention centers, jails, and other correctional facilities.

- INCLUDE temporary holding or lockup facilities if they are part of your combined function.
- EXCLUDE temporary holding or lockup facilities that are not part of your combined function from which inmates are usually transferred within 72 hours and not held beyond arraignment. If your only function is a temporary holding or lockup facility, DO NOT complete this form contact Jennifer Deppe at 1–800–253–2078.

Certainty facilities

- INCLUDE private facilities in jail jurisdictions that held juvenile inmates at the time of the 2005 Census of Jail Inmates and had an average daily population of 500 or more inmates during the 12 months ending June 30, 2005.
- INCLUDE private facilities in jail justidictions that held only adult inmates and had an average daily population of 750 or more at the time of the 2005 Census of Jail Inmates.

Burden statement

Under the Paperwork Reduction Act, we cannot ask you to respond to a collection of information unless it displays a currently valid OMB control number. The burden of this collection is estimated to average 2 hours per response, including reviewing instructions, searching existing data sources, gathering necessary data, and completing and reviewing this form.
